EDUCATION

Philippine Best Training System

Binangonan2024

BS Information Technology · Major in Web Development · Minor in Software Engineering

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Machine Learning, Database Systems, Web & Mobile Development

WORK EXPERIENCE

Posbang Corp. — Web Full Stack Developer

Dec 2024 – Mar 2025

Remote

- Rebuilt and enhanced an organization management admin system for an HRIS platform, handling subscription management for client organizations
- Built frontend features (Laravel + Vue.js) for an analytics dashboard displaying organization and subscription data
- Collaborated with the team using GitLab for version control and deployed staging builds to Heroku
- Authored technical documentation for project workflows, APIs, and system architecture

Augmata Inc. — Junior Web Developer

Mar 2024 – Dec 2024

Bonifacio Global City, Taguig · Remote

- Developed a ferry booking website front end using Bootstrap and JavaScript
- Transitioned to a payroll system project (Visual Basic) that evolved into a full HRIS platform, contributing to weekly updates based on client requirements
- Participated in code reviews and technical discussions with senior developers

MyOwnEva — Web Developer Intern

Mar 2023 – Jul 2023

Torrance, California · Remote

- Designed web layouts and UI mockups using Figma, and created graphics/branding assets using Canva and Photoshop
- Built and maintained website pages using WordPress
- Produced promotional videos for 3 company events and created content for social media channels

PROJECTS

Salon Booking Appointment System (In Progress)

2026

- Building a multi-step appointment booking flow (Next.js + Laravel API) with real-time availability detection based on branch, staff, and working hours
- Designing a MySQL schema across branches, staff, services, and appointments to support multi-branch scheduling
- Developing a separate admin portal for staff to view, filter, and update booking statuses across branches
- Integrating SMS notifications for booking confirmations

Learning Management System (Freelance)

2023

- Built course management functionality with full CRUD operations for lessons and assessments
- Implemented grading and student progress tracking with reporting and analytics features

Web Admin Dashboard for E-commerce App (Freelance)

2023

- Built product management functionality with full CRUD operations, plus order and tracking management
- Developed an analytics dashboard with reporting, role-based access control (RBAC), and audit logs
- Coordinated with the mobile app developer to keep admin and mobile features in sync
